Personal hands on service with a lot of attention to detail is what it takes to get a home sold. When you hire me that is exactly what you get. When you have a question, and you will...you talk to me not an assistant you have never met. You talk to the person you hired to get your home sold. When someone calls my phone number about your home, they talk to me...the broker most knowledgeable about you and your home. I pride myself on the one on one relationships and service I provide my clients with. Isn't that the type of relationship you are looking for when selling your biggest investment?
