

Facebook Photo Dimensions

	Width	Height	Notes
Cover Photo	851px	315px	The Cover Photo is the large panoramic image space at the top of the timeline.
Profile Image in Header	160px	160px	The Profile Image the smaller, square at bottom left of the header, overlapping the cover photo. Its final display dimensions are 160px by 160px, but you have to upload an image at least **180px by 180px**. The thin white border is added automatically and there's no way to remove it.
Profile Image on Timeline	32px	32px	The profile image that appears next to your name on comments and posts is automatically scaled down to 32px by 32px.
Thumbnail for Shared Links	155px	114px	The thumbnail for shared links is the image that comes up with a link when you post a link on your or someone else's timeline.
Uploaded Photos	2048px	2048px	These are photos you upload to an album.
Uploaded Timeline Photo Thumbnail	403px	403px	When you upload an image to the timeline, in other words post an image from the status update section, by default a large square thumbnail is automatically generated at 403px by 403px.
Video Preview Thumbnail	403px	226px	When you post a video on your timeline, a Video Preview Thumbnail is generated at 403px by 226px.

When it comes to mobile devices, there's a huge range of screen sizes, screen resolutions, and software, so the pixel measurements will vary from device to device, from app to app, and even between holding the screen vertically and horizontally.
